Drive Performance

DC è rinomata per l'alta qualità delle catene per motocicletta. Se il tuo obiettivo è la bandiera a scacchi, o la casa della tua ragazza o il tuo ufficio, DC Chains offre il meglio per le catene di trasmissione per motociclette.

Per ogni tipo di moto, c'è una catena DC che ti porterà dove tu vorrai, qualunque cosa tu farai.

QXring

DC QX-Rings sono progettate per trattenere il grasso più a lungo e assicurare una migliore e prolungata lubrificazione.

- > Vita catena + lunga
- > Massima resistenza all'usura
- > Alta flessibilità
- > Forza trazione ottimale
- > Scarsa manutenzione

MANUTENZIONE KIT DI TRASMISSIONE E CONSIGLI PER L'USO

Il kit di trasmissione è un elemento tecnico ed essenziale della sua motocicletta, perciò è un elemento di sicurezza. Un montaggio errato può dare luogo a un danno meccanico ed ad un incidente, questa è la ragione per cui le chiediamo di consultare questo catalogo e di usare le catene raccomandate per ogni applicativo.

Le nostre catene sono consegnate con le giunzioni dedicate per ogni applicazione e per ogni motocicletta.

Il tipo di giunto (tipo CLS) è consegnato con le catene ad alta qualità e necessita di un montaggio ad alta pressione come nei giunti a rivetti. Questo evita l'immediata rottura della catena in caso di perdita di un rivetto ed elimina un consumo irregolare del giunto-maglia.

Ponete attenzione alla testa del giunto, deve essere sempre orientata verso il senso di rotazione.

Prima di sostituire la vecchia catena, è utile controllare e cambiare se necessario: il guida-catena, i cuscinetti della ruota, specialmente il cuscinetto lato pignone, l'usura dei silent block. Siate sicuri che non ci siano punti di contatto tra catena e parti in metallo (carter o forcellone), questo contatto può portare alla rottura della catena.

Per una durata maggiore della vostra catena, lubrificate regolarmente ogni 500/600 km.

Per aumentare la durata, inoltre, vi consigliamo di non utilizzare grassi appiccicosi. Scegliete solo lubrificanti penetranti, fluidi di buona qualità, lubrificando la catena in tutte le aree.

DC raccomanda "DC HT 300" lubrificante catena.

Per pulire e sgrassare la vostra catena usate "DC Power Clean", non adoperare mai getti di acqua ad alta pressione, benzina, gasolio, liquido per freni e getti di aria compressa.

Lubrificare dopo ogni lavaggio e dopo ogni viaggio nella pioggia.

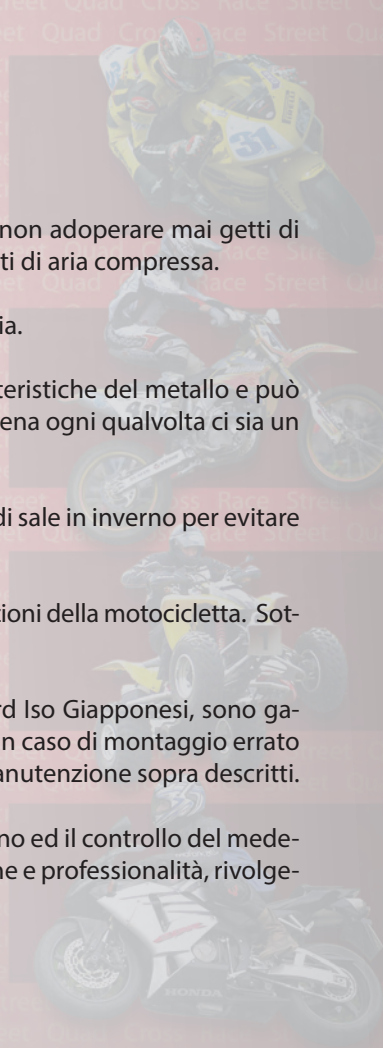

Evitare il contatto con acido da batteria, l'acido cambia le caratteristiche del metallo e può causare una rottura chimica della catena. Occorre cambiare la catena ogni qualvolta ci sia un contatto con acidi.

Lavare la catena con acqua dopo un viaggio su strade cosparse di sale in inverno per evitare la corrosione.

Per la tensione della catena, per favore consultate il manuale d'istruzioni della motocicletta. Sottoponga a tensione la sua catena in condizioni di carico.

Le nostre catene sono costruite seguendo i più recenti standard Iso Giapponesi, sono garantiti contro ogni difetto di costruzione, ogni garanzia decade in caso di montaggio errato del kit trasmissione e del mancato rispetto dei consigli per la manutenzione sopra descritti.

DC può accordare la sostituzione del materiale solo dopo il ritorno ed il controllo del medesimo. La chiusura e l'apertura di una catena richiedono attenzione e professionalità, rivolgetevi al vostro meccanico di fiducia.
